

Civil & Structural Engineer

Position Title: Civil & Structural Engineer (2+ years of experience)

Location: Limerick City

Company: Founded in 2006, DRA Consulting Engineers are an established firm of Consulting Civil & Structural Engineers & Project Managers with offices in Dublin, Limerick and Wexford. As part of our continued growth, we are seeking a chartered civil & structural engineer with career ambitions to enter into a leadership role. We are building a team of motivated and ambitious people for a Limerick Office. The successful candidate will be Civil and Structural Engineer with strong leadership qualities.

DRA Consulting Engineers provide services to both private & public sector clients with an emphasis on economical design, sustainability and a client focused approach. Our projects portfolio includes residential, commercial, educational, conservation, sports & leisure and civil engineering infrastructure developments. We also have particular expertise and experience in civil & structural engineering, project management, high-rise construction, conservation engineering, BIM & ISO 19650:2, construction law & contract administration. Please see www.draconsulting.ie for more details:

Job Specification:

The role will involve the following:

- Civil and structural engineering design across a variety of projects
- Project management and coordination from concept through delivery
- Preparing engineering drawings using Revit and AutoCAD
- Using design software including Robot, Tedds and Causeway
- Collaborating with clients, architects, contractors and multidisciplinary design teams
- Managing project documentation and administration
- Supporting and mentoring graduate engineers and technicians
- Developing practical, efficient and innovative design solutions

The Successful Candidate - Requirements:

The successful candidate must meet the following requirements in terms of skills and attributes:

- Honours Degree in Civil Engineering or Structural Engineering
- 2+ years' experience in consulting engineering
- Strong knowledge of civil and structural engineering principles
- Experience using Revit and AutoCAD
- Excellent communication and organisational skills
- Strong problem-solving and analytical abilities
- Chartered Engineer status or ambition to achieve Chartered Engineer status

Desirable

- Membership of Engineers Ireland or the Institution of Structural Engineers
- Experience with Robot, Tedds, Causeway or similar design software
- Project coordination or project management experience
- Previous experience mentoring junior engineers or technicians

Why Join Us

At DRA, we are committed to supporting your professional development and long-term career growth. We offer a structured pathway to Chartered Engineer accreditation, supported by direct mentoring from experienced Chartered Engineers. Our engineers work on a diverse range of high-profile projects across Ireland, gaining valuable experience in both civil and structural engineering disciplines.

We provide clear career progression opportunities, enabling employees to develop their skills and advance within the organisation. Our supportive, collaborative, and inclusive workplace culture encourages innovation, teamwork, and continuous learning. In addition, we offer training, Continuing Professional Development (CPD), and support for professional memberships.

Working at DRA also gives you access to modern engineering tools, BIM processes, and industry-leading standards, ensuring you are equipped to deliver high-quality engineering solutions while building a rewarding and successful career.

Benefits

- Competitive salary with annual reviews
- Performance-based bonus scheme
- Company pension scheme
- Paid professional memberships
- Ongoing CPD and training support
- Additional annual leave linked to service
- Cycle to Work Scheme
- Active social committee and company events
- Structured career progression opportunities
- Dedicated Chartership support programme

Salary:

Salary will be attractive and commensurate with the successful candidate's level of experience and competencies.

Applications:
